New Crew Management System

M/s. Sheorey Digital Systems is developing the Crew Management System (ARMS) as an interim solution.

ARMS Crew Management System will meet DGCA requirements, and also achieve optimized crew utilization. The aim is to manage the entire operating and cabin crew operation on a single integrated platform. The system will provide real-time visibility of operation and flexibility to manage disruptions by providing real-time crew availability. It will also manage and control crew duty time, leave and sicknesses and provide a plan of operation.

The New System will (i) Enhance safety of operation by meeting all regulatory requirements related to duty and rest; (ii) Provide a stable duty roster and on-line web-portal for crew communication; (iii) Centralized Crew Planning, Crew Rostering & Real Time Monitoring & Tracking of Crew in IOCC; (iv) Quick & real time data to manage disruptions.

This information was given by the Minister of Civil Aviation Shri Ajit Singh in a written reply to a question in Rajya Sabha today.
